Subject: RE: SEMS Financial Reports- pulled 10/29/2015 for Pipeline and for Remedial Action Funds planned for FY 2016
Date: Friday, October 30, 2015 9:00:00 AM

I have reviewed the information for Tar Creek OU5 and Wilcox.

1. The money planned for the OU5 RI is correct. I need an additional \$120,000 to fully fund Hill.
2. The planned money for Wilcox is correct.
3. An additional amount of planned money for Tar Creek OU5 is not showing. This estimate is for technical assistance from either USGS or the USACE for review and input into the model as well as field sample collection and analysis. At this time, USGS gives an estimate of \$180,000 for FY16 for this support. As for the USACE, they expressed interest in supporting us at TC but I will talk with you to see if I need to pursue them if USGS can assist. No need to double efforts or do additional work.

Subject: SEMS Financial Reports- pulled 10/29/2015 for Pipeline and for Remedial Action Funds planned for FY 2016

Please find attached the SEMS Financial Management planned Funding reports for pipeline and for Remedial actions. I was trying to see if these were good starting points for the planned funding for FY16.

Some of the planned special account funding is not showing up for the correct accounts.

Some planned actions probably are not showing on the reports yet.

We are going to get some training on this process, but this is what the reports show as planned as of now.

Thanks,
Jo Ann
